

Project State (5%): In a folder (directory) named State provide a brief report (.pdf preferred) that addresses the following:

1. Describe any problems encountered in your implementation for this project.

I had some problem making the merge function. I also had problem writing the decode program.

2. Describe any known bugs and/or incomplete implementation in the project milestone.

The decode program does not work.

3. While this project is to be completed individually, describe any significant interactions with anyone (peers or otherwise) that may have occurred.

I have not at this moment had any significant interactions with anyone (peers or otherwise) for this project.

4. Cite any external books, and/or websites used or referenced.
